

Industry Appreciation

The AOA fosters an environment of innovation and creates value for members each day. Yet new collaborations in 3D vision, expanding AOA Web offerings and improving Optometry's Meeting® education would not be possible without the support of corporations.

While there are many companies in the ophthalmic field, we hope you take note of those active in ensuring a bright future for the profession of optometry and the AOA. With their help the AOA is striving for improved patient access, organizational innovation and ensuring members are on the path to success. Plus, these generous sponsors helped reduce the costs of Optometry's Meeting® for you.

The list comprises support for the AOA based on support from January 1, 2012 - December 31, 2012.
