2:00-3:00pm

Engage the CLCS on social media (don't forget to tag @AOACLCS!):

Follow us on Facebook, AND

Tweet something about your experience, OR

Post a photo to Instagram.

Build your skills, your résumé, and your relationships. The CLCS is committed to engaging and supporting a new generation of contact lens practitioners. The CLCS Honorable Distinction Award is intended to identify and develop the next generation of leaders in contact lens advocacy, research, and patient care. Does that sound like you?

"I chose to participate in the CLCS Honorable Distinction Program as a way to immerse myself in the world of contact lenses and studies of the anterior segment. As future clinicians, we must improve how we educate patients on contact lens materials, wear, ocular surface health and safety and most importantly that contact lenses are medical devices. I had the honor of meeting some very incredible people at the forefront of this very issue, and for that reason, I'm even more grateful I chose to participate! Thank you to the AOA and AOSA for giving students this opportunity!"

—Jasmeen Bhangu, Western University of Health Sciences College of Optometry, 2018 Awardee

What do you earn? A pin, a certificate, an extra item for your CV, and bragging rights!
